EDUCATION

Rensselaer Polytechnic Institute (RPI) Aug 2025 – May 2028
*Dual B.S. in Computer Science and Information Technology & Web Science, GPA: **3.90/4.0*** *Troy, NY*

- **Certifications: Cisco Certified Network Associate (CCNA)**; Google Cybersecurity; Meta Front-End Developer

EXPERIENCE

IT Operations & Networking Assistant Aug 2026 – Present
Computer Operations, Rensselaer Polytechnic Institute *Troy, NY*

- Maintain and perform light repairs on **100+ safety-critical campus emergency phones** alongside network technicians
- Wipe and factory-reset decommissioned Cisco switches and routers, preparing them for secure resale
- Troubleshoot campus printers and deliver large-format plots to students **within 15 minutes** of print notification

Research Analyst Jun 2024 – Aug 2024
NYC Department of Education *New York, NY*

- Analyzed TeachHub platform usability through interviews with **15+ teachers and administrators**, identifying **4 critical UX pain points** affecting digital education workflows
- Documented findings and delivered recommendations to the DOE's Chief Information Officer, informing platform decisions impacting **1.2M+ students and staff**

Project Research Intern Apr 2024 – May 2024
NYC Department of Education *New York, NY*

- Evaluated the existing student transcript experience through **5+ student interviews**, identifying access as a major pain point and documenting technical and process improvement opportunities
- Presented findings to senior leadership, supporting policy and design changes affecting **300K+ high school students**

PROJECTS

GoTo Transit Planner | **1st Place, HV Open Data Hackathon (17 teams)** | *JavaScript, Leaflet.js, Python* Mar 2026

- Identified **14,000 adults** facing 45+ min trips to adult education, including areas distance-based tools label as served, by integrating a walk + wait + ride transit-time model across CDTA, Census ACS, and NYSED data
- Led a **4-person team** to build a GIS platform that ranks proposed bus routes on equity need, cost per mile, and network overlap, with real road geometry via the OSRM API

EHR System (HackRPI) | *React, Firebase, WebSockets, AssemblyAI, Gemini AI* Nov 2025

- Architected a WebSocket synchronization layer on top of Firebase, enabling real-time updates and simultaneous multi-provider access to patient records
- Integrated AssemblyAI live transcription and Gemini visit summaries, keeping application state synced across clients

MySQL Relational Database | *Python, Bash, MySQL, Linux, Regex* Mar 2025 – May 2025

- Designed a normalized MySQL schema across **8 related tables** and automated table generation using Bash scripts, reducing manual setup time **from hours to minutes**
- Wrote Python scripts using regex to scrape, clean, and load **5,000+ rows** of web data into MySQL

DriveSmart | *Azure, JavaScript, jQuery, AJAX, JSON* Sep 2025 – Dec 2025

- Deployed a web-based quiz engine to Azure supporting **200+ dynamic questions**, real-time score tracking, and a JSON-based content management workflow
- Implemented asynchronous client-server interactions with AJAX to update scores and content without full-page reloads

TECHNICAL SKILLS

Programming: Python, Java, C/C++, JavaScript, SQL, Bash, HTML/CSS
Cloud & Infrastructure: Azure, Docker, Linux, MySQL
Networking & Systems: Cisco IOS, Wireshark, SSH, Network Troubleshooting
Frameworks & Technologies: React, Leaflet.js, REST APIs, WebSockets, GIS
Developer & AI Tools: Git, GitHub Actions, Claude Code, Perplexity, Figma
